Mengxi Yang

Mengxi (Cathy) Yang is completing her 4th year in Human Geography and Physiology, with a minor in GIS. Her current research interests include studying the social and geographic determinants of health, particularly using GIS. She is involved in a variety of projects, including a capstone project focusing on community building at the School of Cities and is also involved with research projects examining the ethnocultural barriers to receiving organ transplants among Chinese Canadians. In the future, she hopes to use her passion in health geography and urban development to creating healthier and more resilient cities.

Alpar Undergraduate Scholarship

Established in honour of the late Zehra Alpar, the Department's student advisor for many years spanning the 1960s through 1990s, by friends colleagues and alumni upon her retirement in 1994, this award is given to an outstanding student who has made significant progress in completing their degree.

Alpar Undergraduate Scholarship

Established in honour of the late Zehra Alpar, the Department's student advisor for many years spanning the 1960s through 1990s, by friends, colleagues and alumni upon her retirement in 1994, this award is given to an outstanding student who has made significant progress in completing their degree.

John Horner Undergraduate Scholarship

Established in honour of the late Zehra Alpar, the Department's student advisor for many years spanning the 1960s through 1990s, by friends colleagues and alumni upon her retirement in 1994, this award is given to an outstanding student who has made significant progress in completing their degree.

Octavia Andrade-Dixon

Octavia is a recent graduate of the Geography and Planning program, with an Honours Bachelor's of Art Specializing in Human Geography with a Focus in Planning and a Minor in Portuguese. Her research interests explore the commonalities of Black and Indigenous experiences across Turtle Island, the Caribbean and South America amidst settler colonialism. She was a participant in the Research Experience Program's Brazilian Indigenous Languages course led by Dr. Suzi Lima, a 2020 Jackman Scholar-in-Residence under the Colors and Overtones project led by Dr. Tamara Walker, and was recently published in the fifth volume of the Caribbean Quilt journal.

Bailey Classen-Schneider

Bailey is in her fourth year at UTSG studying Human Geography, Environmental Geography and GIS. She's always been extremely pa-

ssionate about cities and urban life, and in her current aspirations to obtain a masters in planning, she'd like to continue focusing her research on affordable housing and food security in Toronto. She's had the lucky opportunities this year to begin interning at a local planning firm and to assist as a geography research assistant where she's gotten to explore both of these respective topics further. She's also a freelance illustrator and hopes to bring her creativity to GIS work in the future!

Rebecca Tom

Rebecca Tom graduated from the University of Toronto in June of 2020 and has started her first year at Ryerson University in their Master of Planning in Urban Development. Her research interests include housing affordability, processes of neighbourhood change, community development, and social policy. In graduate studies, she intends to focus her research on Toronto's inner-city apartment towers and understand how overcrowding and density contribute to service gaps in the community.
